WEATHER FORECASTS, 23 DECEMBER 1951 - 12 JANUARY 1952

The following reports were compiled by the State Hydrological and Meteorological Institute, Krakow. All temperatures are in degrees centigrade.

23 December

Generally cloudy and hazy. Possible light rain later in the evening. Temperature during the day slightly above zero, with light frost in the evening. Light westerly winds.

27 December

For southern Poland, cloudy with rain and snow in the uplands, and snow in the mountains. Clearing during the day. Temperature during the day about 3 degrees and about -3 in the mountains. Light southwesterly and westerly winds with moderate winds in the mountains.

28 December

Cloudy and foggy with rain. Snow in the mountains. Temperature range in the uplands from 4 degrees during the day to -3 degrees during the night. Temperature range in the mountains from -3 to -5 degrees. Light southwesterly winds.

28 December -- Skiing Conditions

A foehn in the mountains on Wednesday, 26 December 1951 greatly reduced the snow cover, making skiing conditions much worse. Snow depth in centimeters: Wisla, bare in spots; Istebna, 5; Barania Gora, 25; Klimczok, 30; Skrzyczne, 26;
